

Overview

If desired you can configure CSRDS to send your metadata to Tune In. **To do so:**

1. Select Properties from the Tool Menu and click the HD/IP Output Tab
2. Your Tuneln code without the "S" eg 123456 NOT S123456
3. Enter the username (partner name) from Tuneln.
4. Enter the Password (Partner Key) from Tuneln.
5. Click OK to save the settings are return to the main controller window
6. Click F5-Start to put CSRDS back on-line.

The screenshot shows the 'HD/Stream/IP' configuration window with the 'Output To IP' tab selected. The 'Tuneln ID' field is highlighted with a red box. A callout box points to this field with the text: 'Enter the Tuneln Station ID without the S Username Password'. The window also shows fields for 'Main IP or URL to service', 'Port', 'Back Up/Backup IP', 'Stream ID' (CKDKFM), 'UserName', 'Password', and 'Station URL'. The 'Output Format' section on the right includes options like 'RDS/RBDS', 'Pass Through', 'Triton Digital', 'Telos ProStream', 'Heart', 'Use Template', 'Promo Between Songs', 'URL XML', 'Do Not Send Downloads', 'Do Not Send Sponsors', 'Do Not Send Promos', and 'Do Not Send Alerts'.

Once configured CSRDS will send the now playing data to Tuneln and you will see the Posted to Tuneln event in the event log.
